

NICHOLAS ARNER

330-418-1965 // nicholasarner@gmail.com // <skype:nicholasarner1> // nickarner.com

Skills

Development languages: Swift, Objective-C, C/C++, Java, Python

Proficiency in design applications: PaintCode, Sketch, and Fritzing

Creative coding and prototyping: Max/MSP, Pure Data, Wekinator, Open Frameworks, Processing, Arduino, RaspberryPi, and Quartz Composer

Specialities & Interests

native iOS development, human-computer interaction research, gestural interface design, product development, circuit prototyping, interactive machine learning, audio interfaces

Experience & Projects

SELECTED ALPHA DEVELOPER, GOOGLE PROJECT SOLI; REMOTE/MOUNTAIN VIEW – OCTOBER 2015- PRESENT

I was one of 80 developers worldwide to be accepted into Google ATAP's Project Soli Alpha Developer Project, and was one of 14 developers to be invited to Google HQ to workshop Soli use cases. My work focused on creating instruments using new musical instruments

ASSOCIATE CONSULTANT, WORKSTATE CONSULTING; COLUMBUS, OHIO – FEBRUARY 2016- PRESENT

I am the lead or co-lead developer on mobile app development projects. I've also conducted IoT and big data research for some of our internal projects.

SportsLine by CBS Interactive: Lead developer; worked closely with designers and external stakeholders

Currently working on: Developing an iPad Pro-based kiosk app in Swift for a gov't planning agency

CORE CONTRIBUTOR, AUDIOKIT; REMOTE – AUGUST 2014 - OCTOBER 2016

I am a core contributor of AudioKit, an open-source audio analysis, synthesis, and processing toolkit for iOS and OS X apps. My contributions include operation defaults, presets, tests, and can be viewed on [my GitHub](#).

DEVELOPER AND CO-CREATOR, DELAY TRACKER; REMOTE – NOVEMBER 2014 - PRESENT

The Delay Tracker app allows intercity rail passengers to report train delays to the Federal Rail Administration. Co-designed in partnership with High Speed Rail USA and developed in Objective-C. More info found [here](#).

IOS/OS X DEVELOPER, SQUIRRELS LLC; NORTH CANTON, OHIO – JANUARY 2015 - JANUARY 2016

The core product I worked on was Reflector, a wireless mirroring and streaming receiver for iOS/Android.

Reflector 2.1: Took the lead on a big feature update in Objective-C

Director 2.1: Updated how streaming worked with the iOS9 update

Reflector Student: Co-developed in Swift from the ground up, from prototype to launch

RESEARCH INTERN, FRAUNHOFER IIS; ERLANGEN, GERMANY – OCTOBER 2013 - DECEMBER 2013

I conducted research on human heart sonification using mobile devices. I helped prepare for the 2013 International Sonification Conference; co-presented on "High-Level Audio Programming for Mobile Devices."

Education

Machine Learning for Musicians and Artists, 2016 | Kadenze Certified (Online)

MSc Research in Music Technology, 2014 | University of York (York, UK)

Thesis: Investigating the use of multi-touch gestures in music interaction

Audio Technology Work-Study, 2012 | The Banff Center (Banff, Canada)

BA Music Technology, 2012 | Capital University (Columbus, Ohio)
